Hi Lieutenant – as a follow up to my previous email, speaking on behalf of the Board of Directors for the City of Palm Desert’s El Paseo Parking & Business Improvement District, this group very much supports the implementation of additional Flock ALPRs along El Paseo as well as introducing Flock’s live video surveillance cameras along El Paseo in strategic locations. The district has already realized the benefits that the current ALPR technology offers with the number of criminal identifications and apprehensions it has contributed to since the program started, but there continue to be locations of vulnerability along the street where we do not have coverage. Ideally, we would like to have all intersections and “hot spots” along El Paseo covered by either ALPRs, live stream cameras, or both technologies.

If there is anything the board of directors can do to further advocate for and support this initiative, please let me know and I will be glad to assist.

Thanks, and have a good evening.
