

# RESOLUTION OF CONCERN SOUTH COAST AQMD RULES 1111 AND 1121

Chris Escobedo  
Assistant City Manager

February 27, 2025

PALM DESERT

# BACKGROUND

**Purpose:** Reduce Nox (nitrogen oxides primarily produced by burning fossil fuels) emissions by transitioning to zero-emission electric appliances.

**Rule 1111:** Expands scope to include more furnaces; sets deadlines for zero-emission installations.

**Rule 1121:** Requires zero-emission water heaters; different timelines for new vs. existing buildings

# CONCERNS RAISED

- **High Costs:** Incentives exist, but homeowners/renters may face significant expenses.
- **Grid Strain:** Increased electricity demand, especially during peak times.
- **Implementation Challenges:** Need for infrastructure upgrades, trained installers, and public awareness.
- **Consumer Choice & Feasibility:** Some argue a full shift to electric may not be viable for all.

# Rule Adoption Delayed & Incentives

- **Rule Adoption Delayed:** Compliance may be pushed to **2029**.
- **Expanded Incentives:**
  - \$9M for single-family properties.  
(\$1500 per heat pump HVAC and \$1,000 per heat pump water heater)
  - \$5 for Multi-family properties and small business  
(\$2100 per heat pump for Multi Family and \$4,000 per heat pump for small business)
  - \$2M for training, outreach, and support.

# RECENT ADJUSTMENTS

- **Rule Update:** Focus shifts to **manufacturers**, mandate on consumer is removed.
- **Manufacturer Targets:** Zero-NOx sales targets introduced, but NOx-emitting appliances will still be available.
- **Go Zero Program: 75% of funds** go to overburdened communities applies to Palm Desert;
- Next Stationary Source Committee Meeting: March 21, 2024
- South Coast AQMD Board Meeting May 2, 2025

THANK YOU
