CAL FIRE / Riverside County Fire resources responded to a medical aid inside a underground pump room vault at the Marriott Desert Springs Villas in the city of Palm Desert. The first arriving company officer reported one worker, non responsive inside a confine space and ordered additional resources. There was a second worker who had self extricated prior to the fire departments arrival. The second worker was evaluated by EMS, but denied any treatment or transport. Fire crews developed a confine space entry permit, conducted a safety briefing, and filled all appropriate positions prior to the entry team making access to the patient. Crews extracted the victim from the vault, but he had succumbed to his injuries. The incident was turned over to the Riverside County Sheriffs department for further investigation.
